

The Road Not Taken: College Board Geomarkets and Recruiting
Visits by Selective Colleges

1 section title

Overarching RQ

- What is the relationship between College Board Geomarkets (X) and high school recruiting visit patterns?

Concrete RQs

- To what extent do college board Geomarkets explain which high schools receive recruiting visits from public research and selective private PSIs?
- To what extent are visit patterns consistent with recommendations from the Market Segment?
- If and to what extent does geomarket popularity [Z] mediate the relationship between school composition [free reduced lunch; share Black/Hispanic] and probability of a high school getting a visit [Y]?
